4205 Elinor Street 59. Lafollette High School 28. The highest PM2.5 was 59 micrograms per cubic meter average in a 3 day period December 24 to 27, 2023. The highest average was at 4205 Elinor Street, 60 feet away from an indoor residential wood burner. The lowest average was at Lafollette High School, 1.8 miles away, not near an indoor residential wood burner because Lafollette High School has a golf course on 2 sides, a cemetery on one side and a road on the other side.
