

Episode 56OB December 28, 2023. Using a pool noodle & Christmas tree lights to create the effect of a lit fireplace.

In his issue 1)DIY pool noodle fireplace fake 1)United States headlines. 2)Headlines about Spare the Air in Arizona and California. 3)Asia 4)PM2.5 & Human Health. United States. Do it Yourself with red and yellow Christmas Tree lights and (this is Southern California, a pool noodle). [DIY Your Own Fireplace Insert With A Pool Noodle Hack That Will Light Up The Room](#) House Digest. Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates, a nonprofit organization. A lit fireplace can do wonders for a room's ambiance. However, burning actual wood may not be the most convenient choice. Try DIYing your own. To make your fireplace insert, cut your pool noodle into three lengths, from longest to shortest. If you have a noodle with holes, cut circles on a piece of cardboard to patch them. Skip this step if you have a closed noodle. Then, cover all the noodle pieces with painter's tape and plaster. When performing this DIY, it can get messy, so find a workplace where you don't mind paint splattering on the surface or place your materials on a flat piece of cardboard to prevent getting plaster or paint on your table. To make your fireplace insert, cut your pool noodle into three lengths, from longest to shortest. If you have a noodle with holes, cut circles on a piece of cardboard to patch them. Skip this step if you have a closed noodle. Then, cover all the noodle pieces with painter's tape and plaster. After the plaster dries, paint the pieces black and let them dry. Next, go in with the white paint and add thinner layers to allow the black paint to peek through. Finally, tie your noodle pieces with twine, wrap the lights around them, and place them in your fireplace. You can make as many faux fireplace logs as you want to make the inside look fuller. You'll need to purchase more pool noodles and repeat the steps to give them the firewood effect. If you don't want to use plaster, you can alter this DIY by covering the pool noodles in brown paper by crumpling the paper, cutting it into strips, and applying it to the noodles. The crumpling gives a bumpy effect since the wood isn't smooth. Then, you can paint the brown paper white and add brown spots for a burned look.
