

Episode 56WS August 10 2024. UK wood burning at riots. UK Biomass station 4 times coal emissions
RAWSEP reacts so you do not have to? No the object of these videos is to present the facts so that you can react to the facts and stop burning wood. One fact is that wood burning emits 2.8 times the PM2.5 as the fossil fuel coal burning. Wood burning emits 450 times the PM2.5 as the fossil fuel natural gas burning. Wood burning emits 90% PM2.5 particulate matter of 2.5 micrometer size the perfect size to infiltrate the human lung setting off a cascade of human health problems and early deaths. Once current wood burners have these facts the wood burners who were previously misinformed and have a desire to help their fellow man will stop wood burning immediately. Those who continue to burn after being informed may wish to harm their fellow man. Wood burners given center stages in the episode are from the United Kingdom the first given center stage are owners of wood burning power plants and the second given center stage are far right rioters setting wood burning fires to terrorize their fellow men perhaps in reaction to the far right being defeated in the polls in July. The motivation to burn wood in industrial plants is money when wood burning is known by the industry owners that the PM2.5 pollution will be 4 times higher than coal burning according to the Guardian article in this episode. The motivation of rioters to burn wood in the streets of the United Kingdom is to add to the misery index of their many fellow men who perhaps were the ones who defeated the far right at the polls in July. Counter protesters have recently faced the wood burning rioters in their own streets and outnumbered the wood burners and cowed them. In Episode 56WS 1 World. Frankie Mayo an analyst at Ember said "Burning wood pellets can be as bad for the environment as coal; supporting biomass with subsidies is a 14B United Kingdom Hull and Middlesbrough et cetera. The New York Times. Britain's Violent Riots What We Know Officials had braced for more unrest on Wednesday but the night's anti-immigration protests were smaller with counter protesters dominating the streets instead. A handful of protesters two in masks face a group of riot police officers with shields. In the background are a crowd with a fire and smoke in the air. Anti-immigration protesters clashed with police officers in Rotherham England on Sunday. August 7, 2024. Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates, a 501c3 nonprofit organization. After days of violent rioting set off by disinformation around a deadly stabbing rampage the authorities in Britain had been bracing for more unrest on Wednesday. But by nightfall large-scale anti-immigration demonstrations had not materialized and only a few arrests had been made nationwide. Instead streets in cities across the country were filled with thousands of antiracism protesters including in Liverpool where by late evening the counterdemonstration had taken on an almost celebratory tone. Over the weekend the anti-immigration protests organized by far-right groups had devolved into violence in more than a dozen towns and cities. And with messages on social media calling for wider protests and counterprotests on Wednesday the British authorities were on high alert. With tensions running high Prime Minister Keir Starmer's cabinet held emergency meetings to discuss what has become the first crisis of his recently elected government. Some 6 000 specialist public-order police officers were mobilized nationwide to respond to any disorder and the authorities in several cities and towns stepped up patrols. In one of many riots across Britain see map. In Middlesbrough a group of rioters some masked hurled bottles and rocks at officers. Cars were set on fire and at least nine people were arrested. On Saturday a library and a food bank were set ablaze in Liverpool as groups damaged and looted businesses and in Hull fires were set and storefronts smashed in the city center. How have the authorities responded? The weekend riots prompted a heavy

police response. Nearly 4 000 additional officers were deployed a law enforcement association said. And a government order gave officers in some places special powers to disperse any gatherings or “antisocial behavior ” the police said in a statement. More than 400 people have been arrested and about 100 have been charged Mr. Starmer said after an emergency cabinet meeting on Tuesday — the second in two days. The prime minister who has characterized the riots as “far-right thuggery ” encouraged prosecutors to name and shame those convicted to dissuade others from joining the violent rampages. “ I’m now expecting substantive sentencing before the end of the week ” Mr. Starmer said. “That should send a very powerful message to anybody involved either directly or online that you are likely to be dealt with within a week and that nobody but nobody should involve themselves in this disorder.” BJ Harrington the head of public order for Britain’s National Police Chiefs’ Council said that online disinformation had been “a huge driver of this appalling violence.” Intelligence teams detectives and neighborhood officers Mr. Harrington said were working to identify the people fomenting the violence. They won’t win ” he said. In his remarks on Tuesday Mr. Starmer said that some arrests involved people accused of inciting violence online. The first person to be convicted over online posts since the riots according to the Crown Prosecution Service was a 28-year-old man from Leeds who posted messages on Facebook about attacking a hotel that housed asylum seekers. It said that the man Jordan Parlour had pleaded guilty and been convicted of using threatening words or behavior to stir up racial hatred. Mr. Starmer has called out social media companies over misinformation on their platforms but holding them accountable could be tricky. Britain adopted a law last year that requires social media companies to introduce protections for child safety and to prevent and quickly remove illegal content like terrorism propaganda and revenge pornography. The law is less clear about how companies must treat misinformation and incendiary language. What are the political implications? The riots are the first political crisis for Mr. Starmer who took office a month ago after his Labour Party defeated the Conservatives who had been in government for 14 years. While in power the Conservatives tried to capitalize on public unhappiness over immigration vowing to reduce it though failing to do so . But in recent days they joined Labour in condemning the violent protests. Former Prime Minister Rishi Sunak now the opposition leader said the unrest had “nothing to do with the tragedy in Southport.” The police he said have “our full support to deal with these criminals swiftly.”
