

Episode 56XEA August 21 2024. I'll set fires and I'll bring pain. A comedian imagined wood burning lyrics.

On August 19, 2024 Massachusetts legend James Taylor didn't get to play a song at the Democratic National Convention. The singer-songwriter was scheduled to play around 9 PM in Chicago but was mysteriously absent from the DNC stage. Later it was revealed that the DNC skipped elements of their program so they could get to President Biden as quickly as possible so that he could speak directly to the American people according to DNC officials. While Taylor did not get to perform on Monday night, country singer Jason Isbell and Mickey Guyton did get to perform. Prior to being bumped, Taylor was planning on performing "You've Got a Friend." The last time Taylor performed at the DNC was at the 2012 convention. Given the 2024 DNC snub what song with new lyrics could James Taylor perform in his hometown of Boston on September 9 and 10 at the MGM Music Hall at Fenway as part of his 2024 tour? It has been suggested by comedian Stephen Colbert that a new version of James Taylor's hit "Fire and Rain" with updated destructive pyromaniac lyrics would aptly serve as the flip side of "You've got a Friend" to express James Taylor's dark side and James Taylor's wrath at the DNC snub. The lyrics suggested by comedian Stephen Colbert are found in a video on YouTube titled James Taylor rains fire on the DNC. Lyrics **Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates, a 501c3 nonprofit organization.** Just yesterday evening they let me know I was bumped. I'll set fires and I'll bring pain. Create traumas that your mind can't comprehend. You'll learn not to cross J.T. again! **RAWSEP View** notes that these new pyromaniac lyrics imagined by a comedian seem like the highest artistic expression of a talented singer songwriter clearly describing the worst motivations for indoor residential wood burning done for imagined revenge against blameless near neighbors which motivations RAWSEP has always assumed that indoor residential wood burners harbor in the dark recesses of their minds when they start wood burning fires. Hopefully a bright new day is in the future when indoor residential wood burners will no longer be able to act out by unnecessarily burning wood in this twisted fashion. Hopefully a bright new day is in the future when it will no longer be possible to use PM2.5 emissions from indoor residential wood burning to enact misdirected revenge that only damages the lungs eyes and lives of blameless near neighbors. Heat Pump rebates of up to \$8,000 based on a sliding income scale that can be used as carrots to replace the polluting method of wood burning home heating are scheduled to roll out across many United States by the end of 2024. RAWSEPresidents will be publicizing these Heat Pump rebate roll outs on the <https://RAWSEPresidents.com> website and in RAWSEPresidents Youtube videos and Spotify podcasts. Use the QR codes found on this video. You've got a friend in **Residents Against Wood Smoke Emission Particulates, a 501c3 nonprofit organization.**
