Burn only aged and dried wood. The burning of any type of. Also be careful in handling partially burned wood. The wood may still be smoldering and cause a serious burn. Please keep in mind that if the Fire. 8 Massachusetts Cape Cod. Inside Climate News Newsletter. RFK Jr.'s 'Sad' Slide From Environmental Hero to Outcast. Opposition to offshore wind by the third-party presidential candidate turned Trump supporter began decades ago in the waters off Cape Cod. Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates, a 501c3 nonprofit organization. September 22, 2024. In the early 2000s Robert F. Kennedy Jr. then a prominent environmental attorney who had recently been named one of Time magazine's Heroes for the Planet played a leading role in killing an offshore wind farm in Nantucket Sound not far from his family's Cape Cod estate. Project proponents say the fierce opposition by Kennedy a presidential candidate who recently suspended his campaign but remains on the ballot in nearly three dozen states had a long-lasting impact on the U.S. offshore wind industry and laid the seeds for opposition that continues today. It set back offshore wind over 20 years in the United States said Jim Gordon the former CEO of Cape Wind the company that tried to build the Nantucket Sound project. Gordon said Kennedy was often the loudest most combative voice of the well-funded opposition. You have to understand that they created such a brouhaha and so much fear over the technology and the impacts which have proven to be unfounded. Two decades later Kennedy, who recently endorsed former President Donald Trump a candidate who frequently mocks wind power, says he opposes all offshore wind. When asked about the role he may have played in significantly delaying one of the most promising sources of clean energy in the United States he embraced the connection. Kennedy is a vaccine skeptic who has promoted a link between vaccines and autism that has been disproven. Kennedy's Widening Objections to Offshore Wind. Twenty-two years later Kennedy's opposition to offshore wind has expanded beyond Cape Wind to any such projects. Kennedy said offshore wind is killing whales ruining fisheries and is too costly. Three of the five groups calling for the investigation have ties to fossil fuel interests. Federal regulators with the Bureau of Ocean Energy Management noted that sound surveys conducted by offshore wind companies have not been linked to whale deaths and are far quieter than the seismic air guns used by fossil fuel companies to penetrate several kilometers under the seafloor in search of oil and gas deposits. There are no data that suggest that OSW [offshore wind] activities have been implicated in any whale deaths. Offshore wind farms currently being built in U.S. waters typically have a one mile spacing between turbines or slightly more than the European recommendation. Onshore wind and solar developments near population centers along the East Coast are limited by space constraints making offshore wind an attractive alternative. 9 Rhode Island. Rhode Island Receives \$30 Million for Energy Efficiency Rebates. How Can You Cash In? Eco RI News. heat pump clothes dryer. Granholm said those improvements along with updates from existing rebate and tax credit programs in Rhode Island that. 10 South Carolina Pickens County.
