

Episode 56YJ September 28, 2024. The One electoral college point in Nebraska debate.

Episode 56YJ September 28, 2024. The One electoral college point in Nebraska debate. Shake Dapper: Shake Dapper and Ms. Vivid Dash back here as moderators of this Vice Presidential Debate, which up to now has gone well, don't you think, Vivid? Ms. Vivid Dash: The joke the Governor from an M state told jolted me awake and I laughed for the first time in so many, many, minutes. The Governor from an M State reminds me of a Midwestern nice dad. Shake Dapper: Does age really matter during this debate, Vivid? Ms. Vivid Dash: Well, my point was that one of the Debater's ages, 40 years old, contrasts with the age of his running mate's 78 long droning years. I watched the replay of the 78-year old's September 10th debate. In this 40-year old's debate the detail droned on about in lengthy superb paragraphs is boring except that the 40-year old intends to become a dictator on day one after the Pass Passay Pres dies. Like that loudmouth Debater on that momentous day on the September tenth 2024, debate stage. Shake Dapper: Okay, the debaters are coming back on stage. They've discussed haircuts and lapel pins so far. The next question is: indoor residential wood burning, for or against? Shake Dapper: Hello again, competitors! Each of your closing remarks must address the issue of air pollution caused by indoor residential wood burning, and you will each be given 30 seconds. Surprise us, speakers! The coin toss gave the first closing remarks to the current Governor from an M state. Current M state Governor: Here's a handy update. Residents Against Wood Smoke Emission Particulates RAWSEPresidents has made Youtube videos and PDFs of the charts of 80 percent of median income for Arizona, Maine, New Mexico, New York, Rhode Island and Wisconsin. How do you find this information that will help you find out if you qualify for up to \$8,000 for a Heat Pump Rebate? **Go to the text box below this video and click on the URLs or 2 Go to**

https://www.huduser.gov/portal/datasets/il.html#2023_query and hit the brown button for "CLICK HERE for FY 2024 Income IL documentation", then click on your state on the left and click on your county, city or town name on the right. Look at the bottom left and you will see if your household qualifies as 80 percent of median income based on how many people are in your household from 1 person up to 8 people. If you want a chart of every part of your state **1 For ARIZONA videos go to** <https://www.youtube.com/watch?v=VOxJHFtu2-o&t=55s> or <https://www.youtube.com/watch?v=iUK3VEv3ubM> for ARIZONA PDF go to <https://rawsepresidents.com/2024-heat-pump-rebates-arizona/> **2 For MAINE videos go to** <https://www.youtube.com/watch?v=0JZ5U-rjTM&t=58s> or <https://www.youtube.com/watch?v=UuDZI8u7ESE&t=317s> for MAINE PDF go to <https://rawsepresidents.com/2024-heat-pump-rebates-maine/> **3 For NEW MEXICO videos go to** https://www.youtube.com/watch?v=F6C_5YG5d_w&t=39s or <https://www.youtube.com/watch?v=LTb30LyEdyk&t=87s> for NEW MEXICO PDF go to <https://rawsepresidents.com/2024-heat-pump-rebates-new-mexico/> **4 For NEW YORK videos go to** <https://www.youtube.com/watch?v=W8-SOKf71Z8&t=44s> or <https://www.youtube.com/watch?v=q-fkUNVvTXQ&t=385s> or https://www.youtube.com/watch?v=cakxAO9C_6U&t=54s or <https://www.youtube.com/watch?v=pmnwXuhY8EU&t=307s> for NEW YORK PDF go to <https://rawsepresidents.com/2024-heat-pump-rebates-new-york/> **5 For RHODE ISLAND videos go to** https://www.youtube.com/watch?v=8_Jw0tLjoEA&t=24s or https://www.youtube.com/watch?v=Saa1HvX_9TU&t=52s for RHODE ISLAND PDF go to <https://rawsepresidents.com/2024-heat-pump-rebates-rhode-island/> **6 For WISCONSIN videos go to** <https://www.youtube.com/watch?v=2xzx6n8ejOY&t=41s> or <https://www.youtube.com/watch?v=rSO4RIJ7ApU> or <https://www.youtube.com/watch?v=xW6X0KMadnw&t=470s> or <https://www.youtube.com/watch?v=c6zEzK3vSss&t=1614s> For WISCONSIN PDF go to <https://rawsepresidents.com/2024-heat-pump-rebates-wisconsin/> Interested in RAWSEPresidents? If you want to search for RAWSEPresidents videos by subject, description or Episode number go to <https://www.youtube.com/@rawsepresidents4370/videos> find the MAGNIFYING GLASS and search using

the search box. If you want to search RAWSEPresidents website by subject, description or Episode number go to <https://rawsepresidents.com/> and find the MAGNIFYING GLASS to use the SEARCH Box. You will find more PDFs there. RAWSEP residents stands for Residents Against Wood Smoke Emission Particulates. RAWSEP residents would like you to replace indoor residential wood burning with Heat Pumps. Heat Pumps have met the Cold Climate Challenge. Heat Pumps work to heat homes when outside temperatures are down to 40 degrees below zero in 2024, double as air conditioners, and save money on your monthly electric bills immediately. Rebates of up to \$8,000 based on a sliding income scale are being rolled out by each United State in 2024 for Heat Pumps that work down to 40 degrees below zero. Here we are in September and Heat Pump rebates have been in effect in New York State since May 31, 2024! Wisconsin will this fall be maybe the second state to roll out these air clearing and global warming fighting Heat Pumps Rebates in this wonderful and fateful month on September 2024! A full rebate of \$8,000 is possible in Madison Wisconsin by the Fall of 2024 for a family of four with a median income of \$97,800. Heat Pump rebates of up to \$8,000 based on a sliding income scale will be available at Focus on Energy in Wisconsin including in the capital city of Madison Wisconsin in the Fall of 2024. Go to <https://focusenergy.com/residential/heating-and-cooling> For example 80% of median Madison Wisconsin income is \$97,800 for a family of 4 and 80% of median Madison income qualifies residents for up to an \$8000 rebate on Heat Pumps that work down to 40 degrees below zero (Fahrenheit and Centigrade Temperature scales briefly converge at 40 degrees below zero). Stop burning wood. Wood burning emits 90% PM2.5, particulate matter of 2.5 micrometer size, the perfect size to infiltrate the human lung, setting off a cascade of human health problems and early deaths. PM2.5 also hastens climate change. Don't go back to the bad old days of indoor residential wood burning! What else has happened since June 2024? The United Kingdom's wood burning power plant Drax has been fined 33 million United States dollars for using wood from protected Canadian forests in their wood burning operations and hiding those facts from the United Kingdom Government! But there is still the threat of air pollution from wood burning in the United Kingdom! Drax still has a multibillion Great British Pound taxpayer money contract to burn wood in its United Kingdom industrial plant and Drax still has a multibillion Great British Pound taxpayer money contract to bury the emissions under the ocean floor in yet another expensive and dubious Carbon Capture scheme that has been tried for decades and never works. Just don't burn wood to begin with. A report from Ember has shown that Drax switching from wood burning to coal burning has increased Drax CO2 emissions fourfold rather than reducing any CO2 emissions in reality. But in a ray of hope the United Kingdom serves as an example of tough, at least tougher than the United States, legislation against wood burning stoves that emit PM2.5 that enters the yards of near neighbors and sickens them. These Heat Pumps, which run on electricity and so do not burn any fuel that pollutes the air, can connect to an electric grid that reaches all rural areas, soon to be powered by only the clean energy of wind, solar and geothermal. Heat Pumps also reduce monthly heating bills immediately and can be used as air conditioners as well. Natural gas furnaces can be used in the meantime as a bridge to the cleaner energy sources based on wind, solar and geothermal energy. Based on testing of the cleanest burning wood stove in the United Kingdom, the Ecodesign wood burning stove: Wood burning emits 450 times the PM2.5 as the fossil fuel natural gas burning and Wood burning emits 2.8 times the PM2.5 as the fossil fuel coal burning. Other indoor wood burning appliances such as fireplaces emit even more air polluting PM2.5 which also reaches the yards of near neighbors and also sickens them. Wood burning emits 90% PM2.5, particulate matter of 2.5 micrometer size, the perfect size to infiltrate the human lung, setting off a cascade of human health problems and early deaths. PM2.5 also contributes to hastening Climate Change. Laws should be passed to use PurpleAir PM2.5 monitors hyper-locally in the yards of near neighbors of indoor residential wood burners to gather data on levels of PM2.5 above Environmental Protection Agency National Ambient Air Quality Standards (EPA NAAQS) or World Health Organization (W H O) PM2.5 "safe" standards of 5 micrograms per cubic meter, and use that data as evidence to shut down polluting indoor residential wood burners, rather than continue using the "failed" (according to the Office of the Attorney General (O I G), Watchdog of the EPA) New Source

Performance Standards (NSPS) program of wood stove certification, which results in most or all of wood stoves certified by the EPA since 1987 being highly polluting, and not meeting even the lax standards of the EPA because of giant loopholes to compliance by wood stove manufacturers! Do I have any time left, Shake Dapper! Shake Dapper: Ten seconds! Governor of an M State: I care about the health and lives of my fellow Americans, and I work every day to lower costs for drugs, along with my friend Ernie, you know him from Sesame Street! By preventing illness and early death for near neighbors of indoor residential wood burners, medical costs will also be cut in the United States, and that darn deficit will be eliminated! Also, the feedback loop of wildfire and indoor residential wood burning PM2.5 hastening climate change, and climate change causing flash floods and extreme heat this summer requiring the use of Heat Pumps as air conditioners, will slow down! Shake Dapper: Governor of an M state, I'm impressed. You did compress that down to 10 seconds. Adieu. Our work of informing the American people is done. Ms. Vivid Dash: Not so fast, Shake Dapper. There is still one more to go. Representative of an O State? Representative of an O State: I demand a full 30 seconds. I will not answer your question, but instead sign off as I always sign off, droning on about eating cats and dogs. I am on message as I have been in countless intimate tete a tetes with a few reporters across town from the horribly big rallies the Governor from an M State has been holding. I drone again, and again, Tax breaks for the rich, rich, rich. I went to a convention in a horrible town, horrible, but you misunderstood him when my running mate said that. I have the last word and then I can finally go hug my couch. Shake Dapper: Representative from an O state, Adieu. Ms. Vivid Dash: We must dash. Adieu also, and Good Night!
