

Residential

Heating & Cooling

Heating and cooling accounts for nearly half of an average home's energy usage. Learn how to save on your energy bills.

Insulation & Air Sealing Rebates

One of the best ways to improve comfort, lower your energy costs and boost efficiency in your home is through insulation and air sealing.

Heat Pumps can replace indoor residential wood burning. Heat pumps run on electricity. On 9/6/2024 the Biden Administration announced **7.3 billion dollars to Rural Cooperatives for clean electrification**. The speech in Westby, Wisconsin is on Youtube <https://www.youtube.com/live/zmWfq7y0hwU?>
