

Inspired by games, Residents Against Wood Smoke Emission Particulates is spinning the strategy for persuading indoor residential wood burners to stop polluting the yards and homes of their near neighbors. Hand our spin wheels at gatherings after a fine Thanksgiving dinner. Keep a deck of cards handy as the Spin master and read the details of each category aloud to whoever has the luck to land on a certain game, thus declaring themselves persuadable or persuaders themselves.

RESIDENTS AGAINST WOOD SMOKE EMISSION PARTICULATES SPINNING STRATEGY (AFTER A FINE THANKSGIVING MEAL). RAWSEP FAVORS THE GREEN/YELLOW OPTION

■ 1st Qtr ■ 2nd Qtr ■ 3rd Qtr ■ 4th Qtr

Make people sit for a slideshow of photos of people in Emergency Rooms coughing with enflamed eyes and photos of wood burning wildfires.

Start a Petition to stop indoor residential wood burning in your municipality. In other words, geek out at a party. Go on to make them write letters to their Health Department about PurpleAir PM2.5 monitor levels.

Mind the Gap in Understanding what air pollution from wood burning is. Take questions from your captive audience. Make a big deal about how old, and in what generation the wood burner is. Find out how popular that age idea is.
