

Larry the Litigator Hello Audience Happy New Year I am your Residents Against Wood Smoke Emission Particulates RAWSEPresidents or simply RAWSEP Host for this talk show entitled Incompetent and Irrelevant? Sustained! As always I am wearing the ski goggles in solidarity with the RAWSEP Talk Show Audience

RAWSEP Audience Hello Larry! We are all wearing the ski goggles that we wear in our back yards to protect our eyes from the indoor residential wood smoke PM25 that enters our yards and sickens us from our near neighbor's indoor residential wood burning Thanks for the solidarity message of wearing ski goggles that you always bring to us!

Larry the Litigator Under President Biden Democrats refocused national policy on rebuilding the middle class by creating solid job opportunities with the Infrastructure Law and promoting manufacturing under the CHIPs Act Unfortunately we failed to communicate the effort effectively While President Biden was often quoted saying It's time to grow the economy from the bottom up and the middle out no one really understood that he was talking about creating more solidly middle-class jobs and putting forth a real policy to do just that

RAWSEP Audience Larry the Litigator you failed to mention that there could be nothing more helpful to all sectors of the economy except perhaps for the super wealthy who make their wealth from wood burning than the Biden Administration through the Inflation Reduction Act providing Heat Pumps that work down to 40 degrees below zero and lower monthly electricity bills immediately by the Biden Administration also providing Heat Pump Rebates of up to \$8000 based on a sliding income scale!

Larry the Litigator The Biden administration also arranged funding for development of more wind solar and geothermal energy plants as a clean alternative to burning wood or fossil fuels for industrial energy generation The Biden Administration also arranged funding for expansion of a smart electric grid to all rural areas and arranged funding for development of long term battery storage of wind solar and geothermal energy so that wind solar and geothermal energy will be available at all times even when winds are still and even when the sun is covered with clouds or the sun has set

RAWSEP Audience We have noticed that Drax the largest wood burning power plant in the United Kingdom has recently pointed out that when winds are low and the sun has set or is obscured by clouds less wind and solar energy is generated This assertion by Drax is true

Larry the Litigator The point that Drax makes that without wind there is no new wind power generated and without sun there is no new solar power generated is objectively true The Drax point in this instance was competent and relevant However Drax wood burning itself contributes to the obscuring of solar panels So Drax is part of the problem and Drax is not part of the solution Drax in the case of both air pollution caused by wood burning which causes adverse health effects and Drax in the case of lowering the efficiency of solar panels by 50 percent by the obscuring of the sun with PM25 air pollution from wood burning is itself incompetent and irrelevant to solving the problem of lack of long term storage of wind solar and geothermal energy in many cases today in 2025! So how do we solve the lack of long term storage of wind solar and geothermal energy RAWSEP Audience?

RAWSEP Audience We create batteries that can store wind solar and geothermal energy long term!

Larry the Litigator Competent and relevant RAWSEP Audience! Under a second Trump term Republicans will be focused on delivering more tax cuts to the wealthy at the expense of all other income groups Our guest Berry Masonjar will attempt in this RAWSEP talk show segment to prove that the deliverance to the wealthy will come at the expense of all other income groups in this RAWSEP Talk Show we like to call Incompetent and Irrelevant? Sustained! Berry Masonjar with his extensive legal experience dating back to the 1960s when he starred in a black and white legal drama that at least one current Supreme Court Justice cites as her reason for following the law will demonstrate in the court of public opinion that generally the Trump administration staff lineup is incompetent and irrelevant in the area of stopping air pollution from indoor residential wood burning or deliberately intends to be incompetent and irrelevant in

stopping indoor residential wood burning If they are competent and relevant and supportive of stopping indoor residential wood burning let them speak now or forever hold their peace! No? Silence Crickets Interesting but not unexpected

RAWSEP Audience Oh here is Berry Masonjar now!

Larry the Litigator Berry Masonjar You starred in a TV show and also helmed the Berry Masonjar Experience where many of your early legal victories were later set to music Are you participating in the competition starting today New Years Day 2025 and culminating in the sing off on Earth Day at many locations around the world of songs dedicated to the virtues of Heat Pumps?

RAWSEP Audience To us Heat Pumps are the best clean alternative to indoor residential wood burning Heat Pumps render wood burning for home heating undeniably incompetent and irrelevant! With rebates Heat Pumps are cheap to own and to run! With a smart electric grid and long term battery storage of wind solar and geothermal energy generation there should be no emissions harmful to humans or extremely low emissions all along the chain from energy generation to turning on the Heat Pump itself!

Berry Masonjar My legal victories are myriad and of course competent and relevant to the cause of stopping indoor residential wood burning I always took the side of the innocent victims and proved what the truth really was although the outcomes in court were sometimes surprising Pretty much all the time the guilty fessed up in the last 5 minutes and everything was neatly tied up with a bow

RAWSEP Audience We do not expect the guilty to fess up It is okay if we skip that We are realistic as well as competent and relevant The evidence of pollution is enough and we can get that now from hyper-localized PurpleAir PM25 monitors hanging from the eaves of near neighbors of indoor residential wood burners We can reinforce the pinpointing of where the pollution is coming from by using security cameras pointed at the chimneys of indoor residential wood burners but being careful not to violate the privacy of human beings by looking only at the rooftops where no human is walking around on the roof

Larry the Litigator So you seem to be primarily a songwriter today Berry Masonjar

Berry Masonjar Yes my singing voice is what you expect from seeing me on TV A low register a little like Berry Bite who was big in the 1970s as you may recall

Larry the Litigator The new sound of Heat Pump songs coming out of all place northern California seems to take a page from Berry Bite and Barvin Bay

Berry Masonjar Barvin Bay What a voice! And everything had double meanings So deep River deep and mountain high

Larry the Litigator You seem to bring nature into everything in your songs today

Berry Masonjar After the TV show I spent decades on Maui cultivating the exotic flowers you see in drugstores and can buy online today

Larry the Litigator To get back to the Heat Pump song competition that will culminate in a sing off at various locations around the world on Earth Day 2025 Tuesday April 22 2025 What are some of the titles of your Heat Pump songs?

Berry Masonjar I know that the northern California group is settling on a Barvin Bay sound I prefer Berry Bite because it has a little more bite and his contemporary Bonna Bee Hummer I love to love the Heat Pump Simple but gets the point across

Larry the Litigator Hey! we have run out of time It is so good to hear that you are still singing and still composing Berry Masonjar! Can you talk us out with your magnificent litigator voice?

Berry Masonjar Your honor! Incompetent and irrelevant? And then the judge agrees with me and says sustained almost every time! Heat Pumps rule!

RAWSEP Audience Thanks for wearing the ski goggles in solidarity Berry Masonjar! Happy New Year!
