neighborhoods many strewed with smoldering ash to survey the damage Air pollution levels remained high in many parts of the city including northwest coastal Los Angeles where the air quality index climbed to dangerous levels Los Angeles has seen air pollution at levels that could be raising daily mortality by between 5 to 15 percent That means current death counts are likely large underestimates 2B California LA Fires Show Limits of America's Efforts to Cope With Climate Change **Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates a 501c3 nonprofit organization** California has focused on fortifying communities against wildfires But with growing threats that may not be enough Jan 10 2025 The rapid spread of this week's fires into dense neighborhoods where they burned homes furniture cars electronics and materials like paint and plastic made the smoke more dangerous We have fires all year round that affect the same population repeatedly Now pollution from wildfires is reversing what had been a decades long improvement in air quality brought about by cleaner cars and power generation Since at least 2016 in nearly three quarters of states in the US mainland wildfire smoke has eroded about 25 percent of progress in reducing concentrations of a type of particulate matter called PM 2.5 a Nature study in 2023 found In California wildfire smoke's effect on air quality is offsetting public health gains brought about by a decline in air pollution from automobiles and factories state health officials have found By releasing carbon dioxide and **RAWSEP interjects here PM2.5** into the atmosphere wildfires are themselves a big contributor to climate change: The Canadian wildfires in 2023 produced more greenhouse gases than the burning of fossil fuels in all but three countries At one point in 2023 more than a third of Americans from the East Coast to the Midwest were under air quality alerts from Canadian wildfire smoke Children should not cleanup after a wildfire PM2.5 particulates are so small that they go deep down into our lungs and can pass from lungs into blood And once they are in blood they can be carried around our body and build up Air pollution affects our entire body and It has effects diabetics on the liver and on the kidney and the brain Advice in areas with smoke Read air quality alerts and follow evacuation orders Stay indoors as much as possible and use air purifiers When outside wear N95 masks Don't do strenuous exercise in bad air Cut back on all kinds of air pollution said an American Lung Association physician 3 New York Trump Discusses Tax Cuts for New Yorkers With GOP Lawmakers **RAWSEP View** Tax cuts for the rich planned by the Trump Administration would benefit the rich the top 1 percent of income groups while the bottom 99 percent would likely face attempts by the Trump administration to cut social programs that people cannot live without such as Social Security If middle and low income American lose their social safety nets such as Social Security ordinary Americans will not be able to replace indoor residential wood burning with clean energy Heat Pump even with Heat Pump Rebates for up to \$8000 based on a sliding income scale **Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates a 501c3 nonprofit organization** Trump told Republicans from New York New Jersey and California to come up with a plan for increasing the state and local tax deduction At the meeting on Saturday the House Republicans offered a variety of ideas to Trump about how to address the tax issue Jan 12 2025 12:26 pm Trump reiterated his support for undoing a major provision of his 2017 tax law on Saturday when he told more than a dozen House Republicans at his Florida estate to come up with a plan for increasing the state and local tax deduction according to four lawmakers who attended Republicans put a \$10000 cap on the deduction often called SALT during Trump's first term to help cover the cost of the broader 2017 tax law they passed along party lines Lawmakers at the meeting also pitched Trump on taking federal action to halt New York City's congestion pricing plan

This block contains two screenshots. The top screenshot is from an NBC News article titled 'Gov. Newsom says LA wildfires could be worst natural disaster in U.S. history: Full interview'. It features a photo of Governor Gavin Newsom and includes social media interaction options like 'Like', 'Comment', and 'Share'. The bottom screenshot is from a 'MEIDASTOUCH PODCAST LIVE' stream. It shows two hosts, Ben and Brett, with a large yellow arrow pointing to a video inset of Donald Trump. The text on the screen reads 'TRUMP HITS NEW LOW!! BEN & BRETT EVACUATE LA!!' and 'LIVE: MeidasTouch RESPONDS to Breaking News... Ben & Brett EVACUATED'. Below this, it says 'In this episode of the MeidasTouch Podcast, we discuss updates about the California wildfires...'.
