

Episode 57DHF May 4 2025 Talk Show Spy Doctor! Prescribing the COVID 19 Vaccine to James Pond!

Larry the Litigator Welcome Residents Against Wood Smoke Emission Particulates to our Talk Show We are traveling far afield today with our guest Gee I Aye Doctor Ms Mary Admirable who was fired today because she prescribed COVID 19 Vaccines for Gee I Aye employees which included Spies First Class like our own American James Pond also known as Pond James Pond whose duties echoed those of the fictional James Bond across the Pond at M I 6 in the fictional films whose agency was run by females like M portrayed by Dame Judy Dench and Miss Money Penny portrayed by Lois Ruth Maxwell in the first 14 films from 1962 to 1985 in that fictional universe

RAWSEP Audience Those Bond films were something like the Marvel Universe Films not really reflecting any reality but portraying the fictional James Bond as an agent for the real British Secret Service The fictional James Bond in the books by Ian Fleming worked for M I 6 which is a division of the real British Intelligence Services M I 6 You may know that in the United Kingdom UK in reality M I 6 is the governmental agency responsible for dealing with matters of internal security and counter intelligence overseas Formed in 1912 the agency was officially named the Secret Intelligence Service S I S in 1964 but the name M I 6 remains in popular use

Larry the Litigator Okay you are saying that no one remembers James Bond from back in 1964 unless they are oldsters Point taken I should retire

RAWSEP Audience No what we are interested in is the female intelligence influence in the real M I 6 or the U S equivalent in the good old U S A this side of the pond! This Spy Doctor at the American Gee I Aye prescribed the COVID 19 Vaccine as soon as the vaccine was available to agents of the Dee I Aye And now she was just fired for doing just that by a functionary of Dump or as I familiarly call him Rump!

Larry the Litigator Mandatory COVID 19 vaccines are the reason for firing Doctor Mary Admirable this week!

RAWSEP Audience Through the grapevine we heard that she saved countless lives on our side of the spy game!

Larry the Litigator It is not just a rumor! It is fact! Late last year the Gee I Aye recruited the doctor Mary Admirable a pseudonym of course to take a top medical job as the director of the Gee I Aye Center for Global Health Services Within days a low ranking operative named Von Rankling a pseudonym of course for a far right provocateur accused her of being the architect of the Covid 19 vaccine mandate of the Pentagon

RAWSEP Audience And she truly was an architect of the Covid 19 vaccine mandate of the Pentagon! And she should be darn proud of it too! She saved many lives!

Larry the Litigator Von Rankling in reality accused Doctor Mary Admirable of genocide and mass mutilation for her support of the Covid 19 vaccine!

RAWSEP Audience We are puzzled A vaccine that is safety tested like the COVID 19 Vaccine should save lives and not kill people too much or not at all A Covid 19 Vaccine saves lives and prevents Long COVID which we do not want our spies to experience It will put them out of action for a while or maybe permanently

Larry the Litigator Right you are! Scientific and medical tests prove that the COVID 19 Vaccine is safe and effective

RAWSEP Audience Oh this vaccine skeptic is confusing Doctor Mary Admirable with Doctor No! Doctor Mary Admirable does not even own a cat to our knowledge

Larry the Litigator Your knowledge is very limited where spies are concerned But Doctor Mary Admirable does not grow her pinkie nail long and sharp as actor Mike Meyers portrays that Doctor Evil does in the Austin Powers films to my knowledge She is also not bald with a facial scar to my knowledge

RAWSEP Audience There is someone who reminds me of Doctor Evil with his clownish demeanor and evil intentions Running the characteristics through my Bat Brain Thinking Thinking Thinking Bingo! There is something very 2025 Evilish about Doctor Evil that reminds me of Dump or Rump as I familiarly call him now that I have become re acquainted with his quaintness and whimsy in the last 100 or so days which as everyone I mean everyone calls the last 100 years of solitude from the rest of the world at least in public opinion

Larry the Litigator The wanton destructiveness The lack of self awareness The stupidity you mean?

RAWSEP Audience Bingo! Hey! Did you know that democratically liberal incumbent prime ministers were re elected in Australia and Canada in the last week based on mass disgusted reactions to what those countries are witnessing Dump or Rump do to America in the last 100 or so days?

Larry the Litigator We need a hero like Doctor Mary Admirable to stay and fight for the health of the Gee I Aye operatives like James Pond or as I like to say Pond James Pond

RAWSEP Audience Well Doctor Mary Admirable was 62 which is super old but she was within only a month of qualifying for full retirement benefits So she is suing the Gee I Aye

Larry the Litigator Lotsa luck! Get in line at the legal firm Doctor Mary Admirable! But seriously we know you are a real person and we wish you well and more than well! You saved many lives with your COVID 19 vaccine mandate for federal employees! You are a heroine!

RAWSEP Audience Well this has been fun talking about the fictional universe of James Bond which is so like the fictional universe of the Marvel films!

Larry the Litigator Well we get our fun where we can find it! Thanks for keeping your super cool Ski Goggles on through this entire episode RAWSEP Audience You remind me of James Bond skiing down a Swiss mountain when you rise in unison and applaud for Doctor Mary Admirable! We have blown her cover as a mild mannered doctor and shown her to be a super patriotic super spy She could not be with us today because that would reveal whether she resembles either actress Dame Judy Dench or actress Lois Ruth Maxwell! This Talk Show has been more like a book club than a talk show Sorry audience

RAWSEP Audience Maybe at the next Talk Show we could get back to the issue of indoor residential wood burning PM2.5 emissions from near neighbors entering our yards and infiltrating our homes and sickening us?

Larry the Litigator Stay tuned for a future episode of the RAWSEP Talk show where we find out finally if the problem of indoor residential wood burning has been solved by hanging a PurpleAir PM2.5 monitor from the eaves of the house of a near neighbor and downloading the data from that PurpleAir PM2.5 monitor as evidence of PM2.5 levels reaching the yard of a near neighbor of an indoor residential wood burner That evidence should be used to shut down each air polluting indoor residential wood burner one indoor residential wood burner at a time if necessary!

RAWSEP Audience That is our simple slogan Larry!

Larry the Litigator Until next time RAWSEP Audience Keep it clean and stay well! And get the next COVID 19 vaccine which should be available in Fall 2025 unless shanghaied by Doctor Evil or Rump or Dump or both!
