1 Trump was born in 1946 which is a year after World War Two ended Trump views the antics of Hitler like an online game to imitate rather than viewing Hitler as a real life figure who caused immeasurable needless pain and death to millions The Trump strategy for gaining money seems to be 1 to lie constantly and 2 to accuse others of what crimes against persons which Trump is intent on committing himself We can note that the father of Trump was criticized in a song called Old Man Trump written by Woody Guthrie back in 1954 when Trump was 8 years old The lyrics are a protest song about the racist housing policies of his landlord Fred Trump Donald Trump was involved in defending his father against lawsuits in the

1970s when Trump was a young man in his thirties Instead of choosing a better way as any grown child can do Trump is imitating the worst actions of his father more and more as Trump ages and possibly imitating the worst actions of Hitler more and more as Trump ages We as American citizens are forced to psychoanalyze this lying person and this psychologically projecting person because all his actions impact the economics and retirements of the average poor or middle class American citizen after they retire and impacts the job prospects of young and middle aged Americans as they work for money to live on If poor and middle class people spend their wages more and more on only bare basics such as food clothing and housing and as the Trump government claws back Heat Pump rebates and other support of clean energy choices and alternatives to wood burning that even poor and middle class home owners have the opportunity to take in 2025 poor and middle class people after 2025 may find it harder economically to change to clean alternatives and thus contribute to clearing air pollution in their hyper located neighborhoods by ceasing use of indoor residential wood burning for home heating The emissions from Wood burning also contribute to Climate Change although in concession to the Wood burning industry wood burning emissions are erased from Climate Goals of all countries around the world in 2025 although these emissions are real Heat Pump Rebates are scheduled to be clawed back by the Trump government in spite of the fact that Heat Pumps once installed lower monthly electrical heating bills immediately After following the actions of Trump since January 2025 it obvious that this is not a winning situation for poor and middle class voters and citizens and from the Trump perspective it was never meant to be win for anyone but himself The average voter and citizen must analyze the actions of Trump in order to build arguments that could be used in courts to stop destructive actions against the majority of the American people On this RAWSEP Website the editor hopes that some of the news and news analysis presented here will fuel arguments that can be used in court to gain back Heat Pump Rebates funded by the Federal Government and gain laws that shut down indoor residential wood burning which violate the PM 2 point 5 limits set by the World Health Organization of 5 micrograms per cubic meter 2 Leslie Odom was born in 1981 He portrayed Aaron Burr on Broadway starting in 2015 He is returning to that role in 2025 on Broadway again Like the character of Judas Iscariot in Jesus Christ Superstar which also started as a Broadway musical the character representing Evil in a classic Good versus Evil plot the character of Aaron Burr is nuanced and has recognizable human emotions as well as Evil impulses That nuance in a villainous character is a gift to actors who may reject a role that does not allow them to appeal to audiences as well as move forward a plot How many musicals have for instance the Unabomber as a sympathetic character? Perhaps this nuance of character depiction of evil doers is not a good thing but is probably protected by the first amendment and by the recognition that these are fictionalizations of real people Leslie Odom has a gorgeous voice and compelling delivery and makes Aaron Burr a memorable character that depicts recognizable and touching human characteristics through songs It is too bad that some real life people which we sometimes luckily label criminals have no nuance to their characters and only live to hurt other people sometimes on a large scale 3 The Unabomber was born in 1942 He used a wood burning stove in his cabin although his younger brother did not The surviving brother of the Unabomber states that the Unabomber was the subject of a psychological experiment during 3 years of undergraduate attendance at Harvard According to the brother of the Unabomber in an interview aired September 28 2025 For some reason the Unabomber exhibited such mental illness at Harvard that the Unabomber was duped into spending time with someone who the Unabomber thought was a fellow student but who was actually a graduate student who either decided to or was told to attack the Unabomber psychologically perhaps in a misguided effort to cure the Unabomber of antisocial tendencies he exhibited even as an undergraduate What caught the attention of the editor of RAWSEP was that the younger brother of the Unabomber imitated his older brother the Unabomber enough to also live in an isolated cabin himself also without even a latrine for several years only The key difference between the two brothers in these years was that the younger brother did not operate a wood burning stove for home

heating although the Unabomber famously did The reason that the brother gives for not using a wood burning stove is that the brother resided in Texas which does not have cold winters and the Unabomber resided in Utah which has cold winters The Editor of RAWSEP takes this opportunity to now point out that wood burning stoves should be replaced by Heat Pumps which work down to 40 degrees below zero in 2025 and lower electrical heating bills immediately This substitution should be done to protect the health both of the wood burner himself as well as the short term health of near neighbors of the indoor residential wood burner The PM2 point 5 emissions and CO2 emissions from wood burning are 2 point 8 times those of coal burning The PM2 point 5 emissions from wood burning are 450 times those natural gas burning The Editor of RAWSEP takes this opportunity to note that even in Rural Areas electricity is widely and even it could be said universally available at least in America The second and more important difference between the two brothers was that the younger brother turned the Unabomber in 1999 when he realized that the package bombs that the Unabomber sent over many years had killed 3 people and horribly maimed 23 others One victim of the Unabomber who survived after 100 pieces of shrapnel which hit him in 1987 is also now a friend of the brother of the Unabomber The Unabomber killed himself in prison in 2023 4 The Zombies formed a rock band in the early 1960s Recently on CBS Sunday Morning they were interviewed and the interview was broadcast on September 28 2025 from 9 17 AM to 9 24 AM Central Standard Time Their story is compelling since they had a hit with the jazz and classical influenced rock song She is Not There in 1964 followed by many rock songs in the 1960s culminating in The Time of the Season released in 1967 which became a hit by word of mouth over a year later The Zombies broke up because of economics in 1967 before their influential album Odessey and Oracle was released in 1967 and a new version was released this fall of 2025 However the Zombies reformed successfully in 1999 with original keyboardist and songwriter Rod Argent and singer Colin Blunstone and toured for 25 years until the Rod Argent retirement for health reasons Colin Blunstone continues to tour with his own band The positive and beautiful lyrics keyboards and singing of the Zombies is an antidote to the negativity engulfing Americans and unfortunately the rest of the world from the antics of Trump in 2025 5 Are Rooftop Solar Panels the Solution to the Growing Energy Crisis in America?
