1 With the popularity of Trump dropping the Trump disastrous performance at the United Nations the return of comedian Jimmy Kimmel to the airwaves and the Tuesday election in Arizona of Democratic representative Adelita Grijalva who will provide a vote to release the Epstein files the Trump administration appears to be making a dramatic push to seize complete control of the government

Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates a 501C3 nonprofit organization September 25 2025 Heather Cox Richardson Sep 26 2025 1A Last night Office of Management and Budget director Russell Vought one of the authors of Project 2025 the Far Right document guiding most actions of Trump in 2025 tried to jam the Democrats into passing the continuing resolution to fund the government from Republicans Officials leaked a memo to saying that if the Democrats refuse to pass the Republican measure the administration will try to fire rather than furlough large numbers of federal employees Such a move would be challenged in the courts and the government has been forced to rehire many of the people it forced out earlier this year after those firings left agencies badly understaffed But the threat is not idle Vought is a Christian nationalist who has called for a radical Constitutionalism that demolishes the modern American state and replaces it with a powerful executive House minority leader Hakeem Jeffries D NY

responded Listen Russ you are a malignant political hack We will not be intimidated by your threat to engage in mass firings Get lost Senate minority leader Chuck Schumer D NY said in a statement Trump has been firing federal workers since day one not to govern but to scare This is nothing new and has nothing to do with funding the government These unnecessary firings will either be overturned in court or the administration will end up hiring the workers back just like they did as recently as today Trump appears focused on September 30 when the government funding crisis will hit and the days after it Although courts have ruled that he does not have the power to impose tariffs willy nilly today Trump announced new tariffs of 100 percent on pharmaceuticals 50 percent on kitchen and bathroom cabinets 30 percent on upholstered furniture and 25 percent on Heavy Big! Trucks beginning on October 1 On social media he claimed such tariffs were necessary for National Security and other reasons 1B James Comey Days after Trump demanded that the Department of Justice move now to prosecute those he perceives to be his enemies a federal grand jury has indicted former FBI director James Comey for allegedly lying to Congress and obstructing an investigation Comey was an early casualty of The Trump first administration fired after he refused to kill the FBI investigation of the ties between The Trump 2016 campaign and Russian operatives 1C Trump Replacement of US Attorney Over last weekend Trump exploded at then-acting US attorney for the Eastern District of Virginia Erik Siebert a career prosecutor after Siebert concluded there was not enough evidence of a crime to charge Comey for allegedly lying to Congress or New York attorney general Letitia James for alleged mortgage fraud On Monday Trump replaced Siebert with White House aide and The Trump former personal lawyer Lindsey Halligan and yesterday three sources told Ken Dilanian and Carol Leonnig of MSNBC that they expected Halligan to try to get a grand jury to indict Comey before the five year statute of limitations on lying to Congress runs out next Tuesday On Thursday the DOJ delivered an indictment against Comey My family and I have known for years that there are costs to standing up to Trump Comey said tonight in a video But we...will not live on our knees and you should not either Somebody that I love dearly recently said that fear is the tool of a tyrant and she is right but I am not afraid and I hope you are not either I hope instead you are engaged you are paying attention and you will vote like your beloved country depends upon it which it does My heart is broken for the Department of Justice but I have great confidence in the federal judicial system I am innocent So let us have a trial and keep the faith 1D The Trump Department of Justice sued 6 states in order to obtain voter information in addition to 2 states sued in the recent past The Trump DOJ was busy today It also sued six states California Michigan Minnesota New York New Hampshire and Pennsylvania to force them to hand over their voter rolls and information identifying those voters Matt Cohen of Democracy Docket notes that state officials from both Democratic and Republican governments have questioned why the government wants that information This lawsuit comes after a nearly identical lawsuit the DOJ filed last week against Maine and Oregon Democratic secretary of state Tobias Read of Oregon called the lawsuits an attempt by Trump to use the DOJ to go after his political opponents and undermine our elections 2 At the United Nations in New York on September 24 2025 2A To begin UN debate UN Leader Guterres cited the example of his own resistance in his youth to a dictator in Portugal 2B Trump spoke against the United Nations and Trump spoke against Air Pollution Mitigation Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates a 501C3 nonprofit organization September 24 2025 Heather Cox Richardson 2A In New York City this morning the United Nations opened its General Assembly marking the 80th anniversary of the establishment of the

United Nations itself Secretary General of the United Nations António Guterres warned that we have entered an age of reckless disruption when the principles of the United Nations are under siege Will we choose a world of raw power or a world of laws? A world that is a scramble for self-interest or a world where nations come together? A world where might makes right or a world of rights for all? Guterres urged member states to choose peace rooted in international law human dignity and human rights climate justice to put technology at the service of humanity and to strengthen the United Nations for the 21st century Guterres recalled that his youth in Portugal was spent in the darkness of dictatorship where fear silenced voices and hope was nearly crushed Yet even in the bleakest hours especially then I discovered a truth that has never left me power does not reside in the hands of those who dominate or divide Real power resides from people from our shared resolve to uphold dignity to defend equality to believe fiercely in our common humanity and the potential of every human being I learned early to persevere To speak out To refuse to surrender no matter the challenge no matter the obstacle no matter the hour We must and we will overcome

2B Trump also addressed the gathered world leaders guests of the United States Trump began by complaining that the teleprompter was not working and also mentioned that an escalator on which he and First Lady Melania Trump had been riding had stopped shortly after they stepped onto it The Trump speech went on to depict a fantasy world in which he had single handedly saved the world He claimed that his administration has negotiated one historic trade deal after another and that in a period of just seven months I have ended seven wars He claimed that London has a terrible mayor The Mayor of London Sadiq Khan is Muslim and is of Pakistani descent that it is so changed so changed and that they want Sharia law Then Trump turned to another of his priorities fossil fuels Energy is another area where the United States is now thriving like never before he said We are getting rid of the falsely named renewables After another long harangue about renewable energy he said If you do not get away from this green scam your country is going to fail The speech struck at the heart of the very concept of the United Nations In its wake a foreign affairs journalist captured the larger story of The Trump speech Do Americans see how embarrassing this is? Trump loyalists turned tonight to the idea that someone had sabotaged Trump by stopping the escalator and the teleprompter A UN official said the UN understands that someone from the Trump party who ran ahead of him inadvertently triggered the stop mechanism on the escalator The official said the White House was operating the teleprompter for Trump
