

Webisode 57DHXZY December 3 2025 Making Deadly Cringe Ideas Fringe for Public Health

## Part 1 Making Deadly Cringe Ideas Fringe for Public Health

Larry the Litigator Our 3 Contestants on our RAWSEP Game Show today compete to find out who can make a Deadly Cringe Idea most Fringe in the service of protecting the public! Who makes a specific attack on Public Health most Fringe?

RAWSEP Audience Larry the Litigator! We the RAWSEP audience think you mean Our 3 Contestants will compete to find out who can make a Deadly Fringe Idea most Cringe in the service of protecting the public? Who makes a specific attack on Public Health most Cringe?

Larry the Litigator Right you are! RAWSEP Audience! The most perceptive audience ever gathered in this air purified studio but still wearing the ski goggles that mark us all and those watching at home in their ski goggles in their own back yards as fellow sufferers from indoor residential wood burning PM 2 point 5 emissions that sting our eyes and could cause long term eye damage if we are not responsible wearers of our stylish version of personal protective equipment PPE in our own backyards!

RAWSEP Audience Why do we wear Stylish Ski Goggles again Larry the Litigator?

Larry the Litigator Because! Because you wear it well!

RAWSEP Audience Come on Larry the Litigator! This is our version of a bed time story or an urban myth!

Larry the Litigator Far be it from me to turn down a request to lull an audience into thinking this is fantasyland! This TV studio is an artistic masterpiece! Air purifiers every 10 feet continuously hum! Sometimes people even wear N95 masks in here and this studio resembles a Venice Masquerade during the Black Death period in the Middle Ages! Very evocative of danger and intrigue at what many thought was the end of the world! And it was! If you caught the Black Death!

RAWSEP Audience Come on Larry the Litigator! You have a handsome face and lustrous hair but sometimes the drapes do not match the grey cells of your brain! Put those grey cells of your brain to work or at least let us tell you what we already found about the truth of when exactly those Venice Masquerades first happened like what century! from AI Overview Excerpts edited by RAWSEP for brevity and clarity and relationship to Residents Against Wood Smoke Emission Particulates a 501C3 nonprofit organization People in Venice specifically plague doctors wore beaked masks during the seventeenth century or if you will the 16 hundreds AD during outbreaks to prevent the Black Death in the 16 hundreds not to stop the Black Death from the Middle Ages! The masks were part of a protective costume worn by physicians who believed disease spread through miasma or foul air! They filled the beak which resembled a bird beak with aromatic herbs and spices to ward off the bad air they thought caused the plague while also wearing a long waxed coat and carrying a stick to avoid touching patients!

Larry the Litigator Well that does not sound very fun or festive!

Edy the fact checker slash etymologist May No! It was very Chichi! French physician Charles de Lorme is credited with wearing this outfit to treat plague victims!

RAWSEP Audience Come on Larry the Litigator! Get with the program! More from AI Overview Why did physicians in the 16 hundreds wear the masks in Venice? Miasma Theory! Doctors believed that plague was transmitted through miasma or poisoned air and the mask was intended to filter the air before it was inhaled! Protective herbs! The long beak like nose of the mask was filled with aromatic herbs and spices like rosemary mint or camphor which were thought to purify the air! Sanitary precaution! The mask along with the long waxed coat and gloves was part of a complete uniform designed to protect

the physician from direct contact with patients and their environment! Avoidance of contact! A long stick was carried to examine and move patients without physically touching them!

Larry the Litigator The protective herbs part sounds a little like The Make America Hate Again movement fringe ideas! Not based on science but a little something that a mother who hates her children would impose on them just to be a fashionable Vegan?

RAWSEP Audience Yes! protective herbs in a bird beak mask has no scientifically proven effect on preventing the plague! We know that now 400 years later because we are currently a society of people surviving because our modern society is based on scientific inquiry and medical practices based on science that attempt to save lives! Notice the use of the word science as in the phrase The Scientific Method The addition of herbs was like a shot in the dark on a basketball court with no illumination if you catch my drift! **Edy our fact checker slash etymologist** says that under those conditions The Basketball bounces wildly athwart to use the lingo of the 16 hundreds! The Make America Hate Again movement cheers and coughs on the sidelines just because herbs were used instead of sitting idly in herb containers because their kids hate Marjoram! But social distancing using the long stick and additional flimsy protection from airborne particles with the bird beak mask in the 16 hundreds those two things might have tangentially had some beneficial effect in preventing plague transmission by close contact! Sorry suckers if it had no effect!

Larry the Litigator Those bird beak masks were an attempt to prevent transmission not unlike the truly scientifically proven Personal Protection Equipment of today of N95 masks!

RAWSEP Audience **Edy our fact checker slash etymologist** consulted AI Overview again and we must publish a correction! The term athwart originated in the 14 hundreds not the 16 hundreds! **AI Overview** The term athwart first appeared in the late Middle English period with the earliest documented use dating to around 1470 It is formed from the prefix a and the word thwart and originally meant crosswise or from side to side Etymology! It is a combination of the prefix a meaning toward or on and the word thwart Original meaning Crosswise from side to side or across the line of a course of a ship!

Larry the Litigator Edy you are gumming up the works here! Let us get on with the game! To sum up the Bird Beak Mask of 16 hundreds Venice was a precursor in style to the N95 mask of today used to block COVID 19 transmission! Alas the bird beak mask was only stylish and the scientifically proven benefit of wearing an N95 mask was not inherent in the 16 hundreds bird beak mask!

RAWSEP Audience Close enough explanation Larry the Litigator! We are waiting for you to introduce the 3 contestants!

Larry the Litigator Come on down! Contestant number 1 makes a Deadly Fringe Idea very Cringe in the service of protecting the public! Adele makes a specific attack on Public Health most Cringe! Before the show Adele told a staffer that she intends to make Indoor Residential Wood Burning unpopular by using the words cheugy or sigma! Unfortunately these slang terms have peaked in 2025 and now these terms themselves are now supposedly not widely used! Do you want to change the pejorative terms in midstream so to speak Adele?

Adele Okay! I will simply say that Indoor Residential Wood Burning is cringe or sus! Cringe or Sus!

Larry the Litigator Come on down! Contestant number 2 makes a Deadly Fringe Idea very Cringe in the service of protecting the public! Bic makes a specific attack on Public Health most Cringe! Bic makes Speeding while Drunk Driving down a Residential Street unpopular when termed as cringe or sus! These slang terms are still in use among the Cognoscenti in 2025!

Bic Let me just say that I agree with Adele about Indoor Residential Wood Burning being cringe or sus too! Besides the danger to Public Health of hitting a residential pedestrian while Speeding while Drunk Driving down a residential street the act of driving a gas powered vehicle also emits PM 2 point 5 particulate matter of 2 point 5 micrometer size the perfect size to infiltrate the human lung setting off a cascade of human health problems and early deaths! Gas powered vehicle emissions are second only to Indoor Residential Wood Burning in percentage of PM 2 point 5 emissions polluting the United Kingdom since at least 2022! 29 percent In the UK 29 percent of PM 2 POINT 5 emissions in 2022 came from domestic wood burning This source is the highest in terms of percentage compared to other emissions and it has been noted that wood burning is the only source of PM 2 POINT 5 emissions that has increased over the period covered in the research

Larry the Litigator Do you want to win this competition or not Bic? First place is a legal stop to the named threat to Public Health in your neighborhood! Second place is an air purifier! Third place is only one N95 mask!

RAWSEP Audience Way to break the news way too early Larry the Litigator!

Bic Let me just say that monitoring of Indoor Residential Wood Burning by a near neighbor with a low cost PurpleAir PM 2 point 5 monitor is similar to monitoring of Speeding in a Residential Area with a low cost resident owned monitor called a Radar Gun! And Drunk Driving can be monitored and stopped if the Drunk Driver is required to breathe into a Breathalyzer connected to an Ignition Interlock before trying to start his or her vehicle if that Breathalyzer is a court order such as when a drunk driver is a repeat offender!

Larry the Litigator I have the floor here Bic! Are you saying you like monitoring Speeding in a Residential Area?

Bic It is easy to make that mistake Larry the Litigator! I abhor the extra time and energy of pointing a Radar Gun at the vehicle of a drunk driver who routinely speeds down my residential street! And then I have to call law enforcement so that they can use their own Radar Guns to substantiate my claim of routine drunk driving speeding! And then I have to sue for records about whether a Breathalyzer has been court ordered for the drunk driver but the drunk driver routinely bypasses the Breathalyzer!

**Edy the fact checker slash etymologist** To stop an ignition interlock device IID from working you must first understand the operation of the device and the reasons for its lockout Here are some common causes and solutions for IID lockouts Failed Breath Test If you fail a breath test the IID will enter lockout mode for a state specified amount of time You can then provide another breath sample to start your car Battery Issues A weak or dead battery can prevent the IID from functioning properly Check the health of your battery and connections and consider having it tested or replaced by a professional Electrical Problems If the IID will not turn on it could be due to a power issue or electrical problem Ensure the device is securely connected and check the fuse box of your car Maintenance Needs Regular maintenance is necessary for vehicles with IIDs Notify your mechanic and report any maintenance needs through the Intoxalock Mobile App or MyAccount If you encounter any issues with your IID it is important to follow the instructions provided by your IID provider and contact their customer service for assistance

Larry the Litigator Sounds to me like even when an IID does not work it still probably keeps a drunk driver from driving his or her vehicle! Let us move on!

Bic And there have to be ordinances or laws which allow Radar Gun data from your Radar Gun or a Police Radar Gun to be used by Police to stop speeding drivers on my residential street!

Larry the Litigator Do you realize that this is a competition put on by RAWSEP A K A Residents Against Wood Smoke Emission Particulates and by a voice vote of the audience the RAWSEP audience will probably vote for contestant number 1 to win anyway?

Bic I maintain that educating the RAWSEP Audience about the similarities between Indoor Residential Wood Burning and Drunk Driving Speeding on a Residential Street because both release PM 2 point 5 toxin into the air and both threaten the lives and health of innocent near neighbors of the indoor residential wood burner and the speeder through their residential street is Worth It! And the individual actions of monitoring these actions that threaten our lives and the lives of our families can change and end this behavior destructive to the lives and health of near neighbors!

Larry the Litigator I suppose getting ordinances or laws passed to allow using PM 2 point 5 monitoring data whether done by the resident or by the police later to corroborate used in courtrooms or for police enforcement of pollution laws against indoor residential wood burning is as important to RAWSEP as getting similar speeding laws based on Radar Gun data passed is important to you Bic and your organization! What is the name of your organization?

Bic Well I am not a biological mother so if put on the spot I would call my organization M F A D D

Larry the Litigator Well put Bic! Well put!

RAWSEP Audience Contestant Number 3 please!

Larry the Litigator Come on down! Contestant number 3 makes a Deadly Fringe Idea very Cringe in the service of protecting the public! Cary G makes his issue cringe by accident just by being himself! I will interview Cary for the purpose of making his issue Cringe right now! Cary G makes his specific attack on Public Health most Cringe! Before the show Cary G told a staffer that he intends to make Vaccines unpopular as the terms cheugy or sigma now are! Unfortunately these slang terms have peaked in 2025 and now these terms themselves are now supposedly not widely used! Do you want to change the terms in midstream so to speak Cary G?

Cary G I want to make Vaccines as unpopular as carrion found on the road after a month in the sun!

Larry the Litigator What is your interest in carrion Cary G?

Cary G Carrion is delightful when the blood after one week remains oozed onto the pavement and the tang of decay is not so harsh! But I have my standards although most will not understand my standards my ACIP committee understands my standards and Carrion found and eaten after a month caused a worm to eat part of my brain!

**Edy the fact checker slash etymologist** Carrion is the decaying flesh of dead animals! The use in a sentence is a crow wheeled over the hills in search of carrion!

Larry the Litigator Thank you for sharing! That explains a lot! You have pet crows Cary G?

Cary G They feed me! I pay them! Symbiotic! Natural!

Larry the Litigator I noticed your voice is forced and hard to understand yet videos of you in your youth show a normal speaking voice! Some have cruelly noted that you were a heroin addict for decades and that horrible experience might have something to do with your interesting shriek of a voice unheard from any other living person in the experience of most people!

Cary G Do you understand how many times I had to shriek to be heard in my life?

Larry the Litigator Were you not handed speaking engagements from a young age because of your connection to illustrious antecedents?

Cary G Forced onto the stage with little preparation except a golden ticket to the big time! A child star!

Larry the Litigator A grown up child star with the physique of a flaccid lobster at least from looking at your face! How did that unnatural abomination come about?

Cary G I deal with issues about my appearance by using a Tanning Bed daily! Can you blame me? It is super relaxing to know that at least my skin is being taken care of!

Larry the Litigator Well this has been illuminating and I enjoyed our conversation and the insights into your character that it revealed!

Cary G Just do not offer Fast Food after this contest is over! I look after my health by avoiding ultra processed food!

Larry the Litigator Interesting how you pick and choose your issues! Why are you intent on denying the American people access to Vaccines?

Cary G Given my daily work counseling former Heroin Addicts I have earned the right to make others suffer as much as former heroin addicts suffer every day! Former Heroin Addicts can also relapse and die suddenly! It is very dramatic and like Reality TV when that happens! That gets my juices flowing!

Larry the Litigator That reminds me! Maybe moisturizer would help your face?

Cary G Reality TV! I now work for the master of Reality TV! Firing people for no reason really got his juices flowing! Now I can watch up close when he give the orders! Fire this public servant! Fire that public servant! And now I can do it myself!

Larry the Litigator Funny how most members of your illustrious family have dedicated their lives to Public Service which included Public Health in many instances and yet you are taking actions to deny life saving Vaccines to most Americans? Is that ironic?

Cary G Members of my so called illustrious family have long memories and remember my youthful escapades! A younger member says she is embarrassed by me! I bet they eat ultra processed food!

Larry the Litigator You do not see the illustrious members of your family?

Cary G I was a child star! They want to hitch themselves to my rainbow!

Larry the Litigator More like a bloodied brow than a rainbow!

**Edy the Fact Checker slash Etymologist** Did you know that Washington ordered Smallpox Inoculations for his troops during the Revolutionary War and saved countless lives! If you are counting percentages then 30 percent usually die from contracting smallpox while only 2 percent of Washington troops exposed to smallpox died after they received the Smallpox inoculation! Percentage of death from Smallpox inoculation or vaccination itself back then was much higher than any rare deaths from COVID 19 vaccination today! **According to Wikipedia** The last naturally occurring case of Smallpox was diagnosed in October 1977 and the World Health Organization W H O certified the global eradication of the disease in 1980 making smallpox the only human disease to have been eradicated to date COVID 19 vaccination today overwhelmingly saves lives rather than taking lives! **According to AI Overview** The Hepatitis B vaccine is a safe and effective way to prevent Hepatitis B a liver disease that can be a

short term illness or lead to a serious lifelong infection The vaccine is recommended for all infants children and adolescents who have not been vaccinated as well as adults aged 19 to 59 and older adults with risk factors The vaccine is usually given as a series of two or three shots and can be administered at the same time as other vaccines Who should get the vaccine? Infants The first dose is recommended at birth Children and adolescents Anyone under 19 who has not been vaccinated should get the vaccine Adults The CDC recommends vaccination for all adults aged 19 to 59 Adults 60 and older Those in this age group should be vaccinated if they are at increased risk of exposure and others may choose to be vaccinated as well Safety and side effects The vaccine is considered safe and effective and provides long term protection Some people may experience minor side effects such as soreness fever or fatigue but more serious allergic reactions are rare It will not protect you if you are already infected with Hepatitis B at the time of vaccination

Larry G As a former Heroin Addict I may already be infected with Hepatitis B! Why should infants be offered more protection than I can ever get?

RAWSEP Audience Hey I think we have heard enough! The vocoder that translates the garbled possibly Heroin altered voice works okay but Cary G seems tired from shrieking! The trauma of listening to that voice is a good excuse for us to stop asking the questions that Cary G still needs to answer! We know that Cary G carries on as a mentor to former Heroin Addicts and that explains his motivation for taking away Vaccine access to most Americans at least that is what Cary G believes! The fact that Vaccine denial has already led to numerous unnecessary deaths across the United States in 2025 and the fact that Vaccine denial in the future will lead to additional unnecessary death across the United States seems to interest Cary G not one whit! Let us vote now and forever hold our peace or at least until the next pandemic comes along!

Larry the Litigator Okay! Who is number 3?

RAWSEP Audience Cary G! One N95 mask!

Larry the Litigator Okay! Who is number 2?

RAWSEP Audience Bic of M F A D D! One Air purifier!

Larry the Litigator Okay! Who is number 1?

RAWSEP Audience Adele who has a PurpleAir PM 2 point 5 monitor and 3 years of data on the levels of PM 2 point 5 above World Health Organization Standards of 5 micrograms per cubic meter annually all courtesy of the emissions from the Indoor Residential Wood Burner of her near neighbor entering her yard and infiltrating her home! Adele already has masks and air purifiers! Adele needs legal representation to create ordinances or laws that make that evidence of harm justification to shut down the indoor residential wood burner or wood burners of her near neighbor one wood burning appliance at a time if necessary!

Larry the Litigator That is your motto is it not RAWSEP Audience? You might want to shorten that motto! I will get back to you RAWSEP Audience! The RAWSEP audience never had more Rizz than right now! Despite its length the fact checking of Edy the Fact Checker slash Etymologist was spot on and no cap! **Edy the Fact Checker slash Etymologist** No cap Means no lie or for real Larry the Litigator And Finally Cary G slayed! For all the wrong reasons! RAWSEP Audience And Cary G will probably slay more after the ACIP meetings this week! For all the wrong reasons! 6 7!

Larry the Litigator Goodbye for now Everyone! 6 7! Signing off and Keep it Clean!

RAWSEP Audience All Together 6 7!
