

Webisode 57DHYAFN December 23 2025 Locking in to stop indoor residential wood burning!

Larry the Litigator Hello Studio RAWSEP Audience wearing the stylish RAWSEP Studio ski goggles in solidarity with other RAWSEP members viewing this from their yards and homes hyper locally next to indoor residential wood burners whose air polluting wood burning emissions enter the yards of near neighbors yards and infiltrate the homes of near neighbors necessitating the use of truly protective ski goggles to protect their eyes from PM2 point 5 in their own yards and homes!

RAWSEP Audience What fresh hell do you bring us today? Larry the Litigator let the subject be at least a little escapist today!

Larry the Litigator The subject is Locking in to stop residential wood burning!

RAWSEP Audience Look! We like you Larry! There is no reason to lock us in!

Larry the Litigator One of the absurd useful and funny words or phrases that entered the lexicon in 2025 is Locked In! Despite its prisonlike connotations Locked In in the internet sense merely means freeing oneself from distractions hunkering down and tackling goals!

RAWSEP Audience Okay what is our goal? Oh yes Freeing us! Freeing us from thinking continuously of ways to breathe free air despite being near neighbors of indoor residential wood burners!

Larry the Litigator No I want you RAWSEP audience to lock in on it! Think of breathing free air continuously even when your near neighbor increases the amount of wood he or she burns!

RAWSEP Audience Oh! So embargo the sale of wood to wood burners! Because that is the only way we will be able to stop thinking about the wood burning toxins entering our yards and infiltrating our homes! If there is no wood burning going on!

Larry the Litigator I think without legislation calling for embargos on selling wood to wood burners you will just have to buy more air purifiers and keep them all running continuously!

RAWSEP Audience We will Lock In on thinking about ways to stop Indoor Residential Wood Burning in 2026! Now we want distractions! You know like releasing photos of people who came in contact with wood burners in 2025 who did not burn wood themselves but socially propped up the wood burners by not objecting to wood burning in their presence!

Larry the Litigator Those photos will have to be redacted because you victims of wood burning are pictured in the near distance in your own yards wearing the telltale ski goggles and pointing at the toxic emissions as if to say you object to breathing in the toxins!

RAWSEP Audience Photos redacted like that will not help our cause! Really we want unredacted photos of the actual wood burners actually creating the air pollution by wood burning for no economic or addictive reason! Unlike Cigarette smoking burning wood is not physically addictive because wood does not contain nicotine! There is no need for a

12 step program to stop burning wood! People who burn wood just need to stop and they can easily stop! And using wind solar and geothermal to heat homes and cook food are cheaper than burning wood in 2025!

Larry the Litigator To distract us during this holiday season should we discuss the new internet terms that arose in 2025?

RAWSEP Audience Aura farming That sounds calming

Larry the Litigator A young boy who lives in Indonesia made a video of himself dancing on the front of a boat and he became the face of aura farming

RAWSEP Audience But Indonesia is plagued with air pollution from wood like burning from crop burning which emissions are similar to the air pollution emissions of indoor residential wood burning!

Larry the Litigator How about adding some kind of clothing to your repertoire of protest garb besides stylish Ski Goggles?

RAWSEP Audience You will only cruelly refer to our RAWSEP rags as chopped which has been adopted by many in 2025 as a synonym for ugly or unattractive! We are kind of crashing out here! Those of us up to the age of 28 are giving you the Gen Z stare! Are you giving us Rage Bait which of course is online content deliberately designed to elicit anger or outrage by being frustrating provocative or offensive?

Larry the Litigator I was thinking of styling myself as a Performative Male!

RAWSEP Audience Oh Larry! Will you carry a tote bag and books by female authors and wired headphones and matcha lattes?

Larry the Litigator Only this once will I curate my aesthetic to make myself more likable to progressive women!

RAWSEP Audience Then you would be antithesis of the toxic male! Swoon!

Larry the Litigator This has gone too far! My job is only to encourage you the RAWSEP audience to reflect on where we are as a culture and who we are at the moment through the lens of words we use!

RAWSEP Audience These distractions are a distraction! Let us get back to the topic of stopping Indoor Residential Wood Burning! Now!

Larry the Litigator I could not agree more To the progressive men in the RAWSEP audience I am sorry for the digression into my appearance which does not turn the camera on you I stand in solidarity with most of you by wearing a fake pleather motorcycle jacket even if I do not emphatically do not drive a gas guzzling car and but drive an electric car and am transported by a car which drives itself when in San Francisco which I frequent a lot!

RAWSEP Audience Too much information Larry! We do not want your life story! As a performative male you perform as our announcer in the RAWSEP studio and no more! No more! No more 2025 internet slang! Get on with it! Larry the Litigator Get on with what? RAWSEP Audience Let us go out strong in 2025 by stopping Indoor Residential Wood Burning for good for ever all around the world!

Larry the Litigator Sounds doable! I will get on with it! Adieu for now RAWSEP Audience! And keep it clean!
