

Webisode 57DHYAFZF January 6 2025 Love and Logic versus Monetary Greed Justifying Vaccine Denials!

Cartoon 1 of 3 Love and Logic versus Monetary Greed Justifying Vaccine Denials! Cell 1 It seems illogical to deny vaccines based on Monetary Greed! A woman says I know it is all about the money! A gray haired man replies I sue vaccine manufacturers and get a cut of the monetary profits! Cell 2 In this case specific vaccines are being denied by our current federal government in 2026! A man at a podium says Honestly this decision was made to appeal to a certain voting bloc that can leap this non doctor and nonscientist to the presidency in 2028! Cell 3 Our current federal government is not recommending 6 specific routine childhood vaccines starting in 2026! Members of a crowd say This is reckless! Our children are at risk! Cell 4 These 6 routine childhood vaccines were recommended through 2025! Hepatitis A and B! Meningococcal Disease! Rotavirus! Influenza Flu! RSV Respiratory Syncytial Virus! COVID 19!

Cartoon 2 of 3 Love and Logic versus Monetary Greed Justifying Vaccine Denials! Cell 1 A gray haired man says My brain worm may be making my decisions but I think it is really about the money! The gray haired man continues It makes no sense! Cell 2 Number 1 of 6 Hepatitis A and B Vaccines! Now for high risk individuals! Prevents liver disease! Long Term Protection! Reduces Cancer Risk! Protects Newborns! Cell 3 Number 2 of 6 Meningococcal Disease Vaccine! For specific conditions travel or college dorms! For dormitories but not for children! Prevents severe disease and complications! Prevents severe complications like deafness brain damage limb loss learning disabilities and death! Reduces outbreaks! Cell 4 Number 3 of 6 Rotavirus vaccine! For certain groups after doctor consultation! Prevents severe illness! Decreases hospitalizations and deaths! Vaccine makes infection mild if it occurs!

Cartoon 3 of 3 Love and Logic versus Monetary Greed Justifying Vaccine Denials! Cell 1 Hepatitis A and B! Meningococcal Disease! Rotavirus! Influenza Flu! RSV Respiratory Syncytial Virus! COVID 19! Vaccines are need for these infections! A woman says They are gambling with our health! People will get sick! Cell 2 Influenza Flu Vaccine! Only after discussion with a healthcare provider! Reduces illness and complications! Milder illness! Protects others with herd immunity! Economic benefits! Reduces healthcare burden and absenteeism! Cell 3 RSV Respiratory Syncytial Virus Vaccine! For high risk infants! For adults 60 years old plus highly effective around 80 percent in preventing emergency room visits and hospitalizations and in significantly reducing severe disease! For pregnant individuals 32 to 36 weeks protects newborns from severe RSV during their first six months! For infants direct antibody protection over 70 percent at preventing hospitalization! Cell 4 Covid 19 Vaccine! Now recommended through shared clinical decision making but not universally! Protection against severe disease! Significantly reduces the risk of getting very sick needing hospital care or dying from Covid 19! Reduced transmission! Helps lower the chances of spreading the virus to others! Fewer hospitalizations! Keeps healthcare systems from being overwhelmed!
