Cartoon 6 of 8 Golden Globules celebrates Wood Smoke Free Sunshine! Ukraine edition! Cell 1 Russian offensive ends most clean modern home heating in Kiev! Cell 2 Because of the cold the Mayor of Kiev

recommends that Kiev residents temporarily move in with relatives or friends in other cities! Cell 3 Many who remain in Kiev resort to wood burning for home heating! Cell 4 Experts predict that future statistics will show that Lung Cancer increased that year!

Cartoon 7 of 8 Golden Globules celebrates Wood Smoke Free Sunshine! China edition! Cell 1 Cleaner air in Beijing but chilly homes in villages! Cell 2 Across Hebei Province which encircles Beijing cold villagers are confronting the full cost of the country's push for cleaner air! Cell 3 The central government has banned burning coal for residential heating in much of the province since 2017 Cell 4 in an effort to reduce the choking air pollution that enveloped the capital every winter!

Cartoon 8 of 8 Golden Globules celebrates Wood Smoke Free Sunshine! China edition! Cell 1 At first local governments eased the transition by heavily subsidizing natural gas which is cleaner but more expensive! Cell 2 But this winter officials sharply cut or eliminated the natural gas subsidies! Rawsep interjects that the Chinese Government should have handed out free heat pumps! Cell 3 Reports of villagers huddling under multiple blankets or secretly burning firewood for warmth (wood fires are banned too) had circulated widely on Chinese social media! Cell 4 Last week Beijing announced it had recorded only one day of heavy pollution in 2025 a 98 percent drop compared with 2013! Rawsep interjects that the fault of the Chinese government was not enacting strict pollution controls! The fault of the Chinese government was not handing out free Heat Pumps or not continuing subsidies for the bridge cleaner energy source of natural gas until all could benefit from owning truly clean energy Heat Pumps! If households are modern enough to have natural gas hookups they are modern enough to have electrical connections to power Heat Pumps! China is also leading in the amount of energy generated to the electrical grid through wind and solar energy which accounts for the net drop of in heavy pollution in China!
