Russia says it was only asked to stop attacking Kyiv today

On February 1st drone strikes could make energy again in play

In the woman's apartment in a large complex even inner

Rooms are cold and dim and the faint smell of gas lingers

She uses the stove daily to raise indoor temperatures a few degrees

But even then it barely reaches temperature Celsius 13 degrees

Fahrenheit 55 degrees. The warmth comes with consequences

We do not want to live with mold and it happens in these instances

Since the first attack January 9th, more than 6 thousand residential buildings remained without heating.

Amid subzero temperatures and the coldest winter since the full-scale war beginning,

After Russian attacks on Ukraine critical infrastructure on January 9th 20th and 24th

energy and repair workers managed to get that number below 400 on January 30th.

Zelensky during negotiations said Power supply is a foundation of life.

We value the efforts of our partners to help us protect lives,"

A day ending January 31st or a week spared of strikes in the supposed proposal?

A Philip Morris tobacco warehouse hit though since February 2022 nonoperational.
