Dump will turn out less powerful than FDR
Rich Roosevelt turned out to help the poor
And 2026 has no Depression yet nor
A World War 2 prototype knocking on the door
Unless Dump is a civilization annihilator
And sets the US up to be prostrate on the floor
Which could happen come to think of it
Declaring his end time on the stage has limits
Set by the extent of infatuation of cynics
Dump only creates 30 percent public limerence
Unrequited to the poor for such extended periods
That the public will wise up that his hate is myriad.
Dump will not maintain executive power with nefarious uses
by Dump himself plus his yet uncounted abuses
In comparison FDR used the power he had for the poor
Lifting them up with social programs and was for
Making government work for all while conducting a war
Against Hitler not for Putin nor a dictatorial foreign power
That threatened the sovereignty of Ukraine not to mention
That of Europe and the democratic state of our own union.
