

Webisode 57DHYAFZZEGC A modern day Joan of Arc is less liable to be harmed

A modern day Joan of Arc is less liable to be harmed
By wood smoke if Joan is caught unarmed
The days of ex pats smoking for hours at outdoor cafes
Or locals before roaring fires mindless of their play
While drifting smoke obscures the Eiffel Tower
Past passing tourists who pause to glower
But after a soothing French moue in response
The tourist may fall into remembrance
Of things past and Fitzgerald so dapper
And smoke filled rooms filled with flappers
However a change is coming! Some burning may be banned
In the some villes and ski chalets across the land
In many French towns there are bans or restrictions
On the use of log burners over concerns about air pollution
In many French towns there are bans or restrictions
on the use of open fires over concerns about air pollution
Local authorities in the greater Paris region have also issued their own
Log burning bans due to pollution spikes! Over 12 hundred towns
And villages in France have implemented restrictions
With local authorities allowed to impose ban interdictions
The Alpine Valley of Arve in Haute Savoie was among the first
To ban open fires due to poor air quality Pinot noir is still nursed.
The French government plans to phase out wood heating by 2027
Take solace that Charlottes and Macarons are still leavened!
The phase out impacts use of log burners and the everyday ways
of broadcasting cancer causing agents in cozy cabarets
Local authorities in the greater Paris region have also issued bans
On log burners due to pollution spikes A girl just fell off her divan!
As part of a broader effort to bring air pollution down
Reducing health risks and frowns many towns
In France are banning or restricting open air use
And the French are more likely to refuse
Wood burning fires due to health concerns
Reducing the odds of modern Saint burns!
Over 12 hundred communes have some form of restriction
Local authorities can impose bans! More benedictions?
The most common type of ban is the Interdiction
Des foyers ouverts which Prohibits the open fire tradition
Regardless of the fuel used This trend is particularly evident in
And around larger cities and rural areas bans are prevalent in
Parts of the Alps where air quality has become a concern significant
As a result of bans clean air has a chance to be magnificent!
