

Webisode 57DHYAFZZFF February 27 2026 A sensitive individuals asks for equal time for good

A sensitive individual asks for equal time for good
cortexes naturally turn to solutions understood
Brainstems still control survival
A sensitive individual versus opposite rivals
automatically like breathing and heart rate.
Cerebellums coordinate movement.
When the cerebellum feels overwhelmed
Movements promoting good in the world
Happen. The most rational response is a search for good
The explanation is that a sensitive individual has a need
When money and greed threaten to overwhelm
A sensitive individual works to ameliorate any harm
Trump demands equal time for evil
His cortex was eaten by a boll weevil
His Brainstem still controls survival
Trump versus well intentioned rivals
automatically like breathing and heart rate.
His Cerebellum coordinates movement.
When the cerebellum feels overwhelmed
Movement like a knee jerk to good in the world
Happens. The simplest opposition to good is evil
The explanation is that Trump has a boll weevil
In the Cotton Ball of his brain and money too
And that has always got Trump through
Trump evil is not evil of the Bible
It is cerebellum evil which opposes rivals
Good has the attention of the world
When wars are avoided and all is good
When pollution is avoided. We do not face the void.
We anticipate right actions through scientific rigor
We treat illnesses and vaccinate with inclusive fervor
We create clean energy from wind and solar
And geothermal and hydro to stop temps polar
In our homes but preserve them at the poles
So we can avoid weather extremely roiled
Proof of the Trump brain divorced from reality
Trump has lost ability for public relationality
Even oil companies think attacking wind farms
Causes oil company reputations to be harmed
They are asking Trump to cease and desist
Exist in evil Trump world but simply resist
The earliest obliteration by climate change
Before oil companies collect every exchange
Of money for oil polluting and not derange
Along Trump lines to shut down all clean energy
The cerebellum tells Trump this is infamy!
Those with a cortex breathe a sigh of relief!
