

## Webisode 57DHYAFZZFLHFA March11 2026 Influencers of Indoor residential wood burning

Influencers of Indoor residential wood burning!

To be an influencer is an aspiration of some young  
People. You are popular enough to shape behavior

Of people you may never meet and may be the savior

Of those with ratty hair and spotty complexions

Who otherwise might have psychological complications!

You have the numbers, the hits and the money coming in

And your opinions are listened to, as new traditions!

The phrase "Burning wood" coming from your mouth is golden!

As if is the concept of air pollution is suddenly reborn

A tradition that should never have gone out of grandma style

for vacations, for deadly dull days, and for walking down the aisle!

Young possibly naïve influencers are not alone on the internet

They are pushed and trailed by lobbyists, the wood burning elite

Who know full well they are pushing cancer, heart attack and early death

Along with grandma's favorite recipe for pre scientific analysis "coziness"!

Grandma may have lived alone in the woods, a preternatural Una bombshell,

Influencing her grandchildren to follow her into the maze of the unhealthy Well

Ness movement such as the aspirant for Surgeon General who earns big bucks

Pushing Wellness at a steep price alternative to proven medical knowledge!

Ever make a medical appointment six months in advance

Guaranteed to cure you, but you also need insurance!

You may ask your congressperson to work on lowering costs

Or you may want to squander your money on trendy aesthetics!

It is so much more immediate and you are young and can squander

Your money on Wellness quackery like there is no tomorrow!

Until you have a real health scare like cancer, heart attack or asthma

From Indoor Residential Wood Burning by yourself or a near neighbor

You may dabble in Wellness Quackery and turn a pretty penny

Being a Wellness Influencer in a startlingly anti medical way

That gets you views and likes and wood burning industry favor!

Believe it or not lobbyists are there waiting to use you, and savor,

A sacrificial victim of air pollution, or only an influencer, it does not matter

Your influencer language and manner is a new form of patter

The opportunity to have your young visage before the public

Makes grandma's recipe for disaster palatable to the gullible!

Lobbyists come out clearly as anti-science

Pushing a wood stove instead of a clean appliance

And sue those daring to say "Not Cozy" based on medical knowledge

Around the world wherever scientific knowledge is still hallowed

Lobbyists fraudulently argue that wood burning lowers blood pressure

When the opposite is true along with long term medical issues!

Let's take on Wood Fired Saunas, a foreign born and very old practice

Timeless before electricity powered Grandma's horseless carriage

Electricity powered portable saunas exist that you can set up like a tent

In your own house or apartment, plug in and wait to work up a sweat,

We who are no longer identifiably young swear by them

And indeed think they might work, but heart rates do go up  
It's possible the objective of becoming model thin might ensue  
Or they might just provide a respite from the everyday venues  
There are clean energy alternatives to wood burning wherever you look  
Electricity powered weddings, home heating, you can read a book  
On Solar or even wind powered grills! Taking one on a hike, they are the best  
For roasting marshmallows, not scaring wildlife, nor burning down a forest!  
Hot plunges followed by cold plunges without the friction  
Of rubbing two sticks together! There is electrification!  
That heats water. And the best thing is that electricity can be clean  
If the source is a smart electric grid extending to all rural areas and  
Powered at the source by wind solar or geothermal or hydroelectric  
The impulse to burn wood is not natural, but the impulse is manic  
A psychological urge shaped by lobbyists  
And you the influencer who is a hobbyist  
Your vacation plans or aesthetic urge  
leaves questions of pollution in the dirt  
Those who clean up after you with eyes avert  
Ed know better but sometimes feel helpless against lobbyists  
Who have shaped your self-absorption and mindlessness
