

Webisode 57DHYAFZZFLHL March 17 2026 RFK Junior was in a position as Head of HHS to pull a lever

RFK Junior was in a position as Head of HHS to pull a lever

He denied vaccines to children for no reasons whatsoever

To the rational person left scratching his or her head

What was the rationale for denying vaccines to everyone he could?

But time, energy and taxpayer dollars should be used to solve

Real health problems as well as confront falsehoods as they evolve.

The judge temporarily ruled that the decisions made over the past year

are invalid because the process itself broke the law in three ways last year

The C D C bypassed A C I P, which Congress requires.

Multiple federal laws covering insurance coverage,

Medicaid, veterans' benefits, and the Vaccines for Children program

explicitly tie benefits and obligations to A C I P recommendations.

The HHS Secretary) cannot simply change the immunization schedule

without A C I P involvement. And The new A C I P was not "fairly balanced

as required by the Federal Advisory Committee Act (FACA). Of the 15

members, the court found only about 6 had meaningful vaccine

-related expertise. A C I P charter requires members to be knowledgeable

in immunization practices, vaccine use, or vaccine safety research. Unable

because of the rushed appointment process (replacing all 17 members in roughly

two days, without normal outreach or vetting) undermined and made it tough to see

the committee's legitimacy. Changes were arbitrary and capricious.

The government gave no real explanation for departing from and just

Ended decades of established process, with no possible explanation other

than that it was following a presidential memo. That is not enough under

the Administrative Procedure Act. The judge had something incredible to say

in his ruling. What is next? This ruling is a temporary hold on A C I P while the case

moves through the courts. Get your vaccines now. Just in case.

What happened? A C I P is an external advisory committee to the C D C.

It has an enormous influence on who should get which vaccines

and when. Its recommendations shape what insurance covers,

what vaccines and other medical care physicians can routinely offer,

and how easily families can access vaccines if they choose them or more.

Because of that influence, A C I P has traditionally relied on a few core

principles: Transparent meetings Honest presentation of data Rigorous

review of safety and effectiveness Flexibility when new evidence emerges

This process is not perfect, and there's real room for clarity.

But it works when evidence is weighed carefully, openly, and fairly.

RFK Junior a man without any science degree who scorns medical knowledge

Is temporarily left out of interfering in the public's access to vaccines with an edge

Given to Wellness Cures that put dollars in the pockets of science rejectors

This left American society at the mercy of rumors and hoax inventors

The average American who would like the best possible health care

And has had it up to now although premiums are high with denial scares

Can take a breath and know that RFK Junior is not allowed to interfere

In the near future as the issue goes through courts. But the end could be near.

Although our American medical care was the envy of the world

Lobbyists Chip away for quackery dollars have entered the field.
