

Web 58DHYAFZZFLWRC The Metal Roof of a Barn in Wisconsin

The metal roof of a barn in Wisconsin during a rainy slump

Produced enough interruption of a speech by Dump

To end the harangue after only fifty not short enough minutes

The audience left after imbibing the hate and virulence

As if all were infected with COVID 19 and measles simultaneously

Maybe the influence was muted by the short time of spontaneity

The first time Dump made a speech in Wisconsin since the election

Of Two Thousand Twenty Four that set the US on a collision

Course of ignorance with rejection of scientific and medical knowledge

In order to spread disease and deprivation in planned chaos.
