

Web 57DHYAFZZFLZC July 31 2026 Let us talk about COVID 19

Let us talk about COVID Nineteen  
The smartest guy in the room called in  
Who is threatened because he vaccinated it  
Or at least tamed it among equals in intellect  
Who took the vaccine eagerly as those around them  
Died or experienced long COVID and remember them  
Who died and who helped and who served as researchers  
And gave us hope that not all Americans are deserters  
Of the cause of helping others by wearing masks  
And thinking beyond themselves until at last  
We had vaccines to free us to gather in health  
To continue to evolve, not to hoard wealth,  
And use medicine and science to develop  
Clean energy to stave off wildfire smoke on all maps  
And last but not least to stop burning wood  
Spreading the word, acting for the common good  
Just follow the example of the man at the microphone  
Who saved lives and gave us hope every day, not alone  
The man who is the most loved in America  
Most famous because he saved America.
