Web 57DHYAFZZFLLV October 1 2026 England and Wales 2026 through September PurpleAir PM 2 point 5 monthly averages

The PurpleAir Map uses the standard US EPA Air Quality Index (AQI) gradient color scale to show real-time PM2.5 pollutant levels. [1, 2]

AQI Color Breakdown

Green (0–50): Good. Air quality is safe and satisfactory.

Yellow (51–100): Moderate. Acceptable air, though sensitive individuals may face minor risks.

Orange (101–150): Unhealthy for Sensitive Groups (children, older adults, and those with heart/lung conditions).

Red (151–200): Unhealthy. General public may experience health effects; sensitive groups may experience more serious effects.

Purple (201–300): Very Unhealthy. Health alert; everyone may experience health effects.

Maroon / Brown (300+): Hazardous. Emergency conditions affecting the entire population.
