Web 57DHYAFZZFLMD October 22 2026 Jet Fuel Oil is not Salad Oil!

Jet Fuel Oil is not Salad Oil!
An odd misunderstanding foiled!
In a humor magazine A One
Has a reason, an obvious one!
This is not an advisement,
Enough said on that subject!
Jet Fuel Oil is not Salad Oil!
Do not ingest Jet Fuel Oil!
That is done at your peril
Leave Jet Fuel Oil available
For Jet Planes that can't handle
The heaviness of batteries and all
That paraphernalia of electricity
that now powers drones! Possibly
future planes could hold batteries!
So leave the salad oil to olive trees
And other lipoproteins of high density!
Now that we have solved this controversy
Clearing up all possible misunderstandings
In one full swoop in one singing, stinging
sentence: Say Wood Burning is Polluting!
Do not breathe in fumes from wood burning
From Science, we see that is done at your peril!
Win and Solar stored in batteries is available.
Wood is meant for building homes of the future
and stringed instruments and furniture.
Humans are not built to handle
The heaviness of cancer and all
other health problems with alacrity!
The human body uses bioelectricity!
For heart regulation, research new batteries!
Leave, to themselves, the living, beautiful trees!
Use existing technology for the grid of solar and win!
For home heating and for future flight use solar and win!
